Education

- July 2008 – September 2014 **B.Sc. Biology**
University of Caldas (Colombia)
- August 2015 – August 2017 **MSc. Conservation and Use of Biodiversity**
Pontifical Javeriana University (Colombia)
- August 2018 – August 2023 **Ph.D. Biological Sciences**
National University of Tucumán (Argentina)
- February 2026 – April 2027 **MBA Data Science**
Universidade de São Paulo (Brazil)

Current position

May 2024 - present. Postdoctoral researcher with double affiliation: Department of Ecology, Zoology and Genetics, Institute of Biology, Universidade Federal de Pelotas; Department of Zoology & Physiology, University of Wyoming. *Projects:* Army Ant Followers Project, and Hawaii-VINE Project.

Past positions

- **Jul. 2023 - Apr. 2024.** Postdoctoral researcher at the Institute of Regional Ecology, UNT-CONICET. **Project:** Control systems for pollination service management in blueberry crops.

Profile

I am a researcher with a Ph.D. in Biological Sciences and extensive experience in applying rigorous statistical methods to solve real-world problems related to ecosystem services. My expertise lies in experimental design, Bayesian inference, and causal inference—skills I have successfully applied to design strategies that optimize production and profits in pollinator-dependent crops, such as blueberries. I have a strong publication record, demonstrating my ability to generate robust, reproducible insights suitable for scientific and regulated environments. My researcher's mindset is hypothesis-driven, quantitatively rigorous, and focused on translating complex data into actionable solutions.

Technical skills

- Experimental design and data collection.
- Causal inference.
- Data analysis: frequentist and Bayesian statistics (lm, glm, glmm, hierarchical models, mixed models), Gaussian process models, time series analysis, structural equation modeling, network analysis, and simulation studies.
- Programming languages: R (advanced), Python (intermediate), Stan (intermediate), and SQL (basic).
- Machine learning: regression trees, random forests, basic deep learning.
- Spatial analysis tools: Google Earth Engine (basic), ArcGis (basic) and R packages: *terra*, *raster*, and *sf* (basic).
- Other tools: Git and GitHub for version control. RMarkdown and Quarto for report generation.

Theses

PhD. 2018 - 2023. The step-by-step of pollination service in blueberry crops: patterns and mechanisms. Thesis advisors: Pedro G. Blendinger, PhD; independent research CONICET, assistant professor UNT. Silvia Lomáscolo, PhD; assistant researcher CONICET.

MSc. 2015 - 2017. Seed dispersion and functional diversity of phyllostomid bats in an anthropogenic landscape: a multi-scale approach. Thesis advisors: Francisco Sánchez, PhD; Universidad de los Llanos, Colombia. J. Nicolás Urbina-Cardona, PhD; Pontificia Universidad Javeriana, Colombia.

BSc. 2008 - 2014. Activity patterns, habitat use, and mammals richness in native and reforested forests at the Colombian Andes. Thesis advisor: Francisco Sánchez, PhD; Universidad Militar Nueva Granada, Cundinamarca, Colombia.

Fellowships

- **2023.** Postdoctoral fellowship financed by CONICET, Argentina. RESOL-2023-1026-APN-DIR#CONICET.
- **2017.** PhD fellowship financed by CONICET, Argentina. N° 4122. Thesis: Plant-animal interaction in blueberry crops (*Vaccinium corymbosum*, Ericaceae) and indirect effect with the Yungas forest.

Distinctions

2017 Academic merit award. During MSc degree at Pontifical Javeriana University

2017 Graduated with honors CUM LAUDE. During MSc degree at Pontifical Javeriana University

2017 MSc thesis with honorary mention. During MSc degree at Pontifical Javeriana University

Teaching experience

2024	R programming (Level: graduate)	Universidade Federal de Pelotas
2021	Data Clinic (Level: graduate)	National University of Tucumán
2019	Introduction to R programming (Level: undergraduate)	National University of Tucumán

Graduate courses

2023	Google Earth Engine	REDES Center (CONICET)	60h	Argentina
2022	Introduction to Bayesian statistics methods in ecology	University of Buenos Aires	45h	Argentina
2022	Ecosystem services: concepts, tools and perspectives	National University of Cuyo	45h	Argentina
2022	Data science with Python	National University of Southern Patagonia	40h	Argentina
2021	Models and data in ecology	National University of Comahue	40h	Argentina
2021	Statistical tools for addressing gender metrics	National University of Tucumán	40h	Argentina
2020	Ecological networks	University of São Paulo	60h	Brazil
2019	Pollination Ecology	National University of Comahue	60h	Argentina
2019	13° International Pollination Course	Federal University of Jequitinhonha Valleys	98h	Brazil
2019	Advanced statistical methods in ecology and evolution	University of the Uruguay Republic	60h	Uruguay
2018	Advanced statistical models using programming language R	National University of Córdoba	40h	Argentina
